Michael Hill returns to EyeC as Sales Manager for the UK and Ireland

Hamburg, January 04, 2021. EyeC UK Limited welcomes the return of Michael Hill as Sales Manager for the UK and Ireland, now representing EyeC's complete range of user-friendly and innovative artwork and print inspection systems which ensure accuracy and quality of printed packaging materials.

Michael is well-known in the industry from his previous employment with EyeC UK for over six years as a Sales and Support Engineer and Sales Director, working alongside his father Keith Hill who was the Managing Director before his retirement.

"We are pleased to welcome Michael Hill back to the EyeC UK team," said Dr. Ansgar Kaupp, CEO of EyeC GmbH. "Michael brings over nine years of field sales experience, deep technical knowledge of EyeC's range of print inspection and artwork comparison systems, and established connections with many EyeC customers in the pharmaceutical, printing, and converting industries."

EyeC UK Limited has represented EyeC artwork & print inspection systems in the UK and Ireland for over 13 years and provides local technical support with a dedicated field service technician.

Michael can provide onsite or virtual consultation and product demonstrations. He can be reached at michael.hill@eyec.uk or +44 118 983 3347.

About EyeC

Founded in 2002 in Hamburg, Germany, EyeC is the market's only supplier to ensure the product quality throughout the entire printing process – from the first artwork file to the finished product. The product portfolio includes file-to-file comparison for artwork revision control and prepress applications, as well as print-to-file inspection systems for press sample testing and 100% print quality control of products such as folding cartons, labels, leaflets, or flexible packaging.

The market's most intelligent algorithms ensure that the systems show only relevant defects. With EyeC products, users avoid recalls, keep production costs and material waste in check and optimize their quality control.

Worldwide, there are over 1,800 EyeC inspection systems in use by pharmaceutical companies, printers, and branded good manufacturers. The company currently has over 60 employees in Hamburg and has international sales partners in more than 20 countries.
