

For Immediate Release

EyeC Strengthens Inline Inspection Business in Benelux with New Distribution Partner

Hamburg / Brussels, October 5, 2026. EyeC GmbH, a global provider of automated artwork inspection and print inspection systems, is expanding its European sales network with Induvido BV as a new distribution partner covering the Benelux region. Going forward, Induvido will represent EyeC's inline inspection systems ProofRunner Web and ProofRunner Carton in Belgium, the Netherlands, and Luxembourg. Further information is available at [EyeC.com](https://www.eyec.com).

With Induvido on board, EyeC gains a strong partner for the Benelux market. The young, Brussels-based company, founded by Kenny Dom, combines technical expertise with deep experience in the print and packaging industry. The partnership focuses on sales, consultative selling, installation, and on-site technical support for EyeC's ProofRunner Web and Carton systems. These 100% inline print inspection systems continuously monitor the full production run of roll-fed materials such as labels and flexible packaging, as well as folding cartons, flagging relevant defects in real time. This enables early defect detection, more targeted control over production processes, and reduced unnecessary waste.

"We're excited to partner with EyeC and give our customers access to a proven inline inspection solution. With quality, efficiency, and process reliability becoming ever more critical, we see significant potential for the EyeC ProofRunner systems in the Benelux market," said Kenny Dom, Business Manager at Induvido.

"Induvido understands the demands of the print and packaging industry and offers the direct market access we've been looking for to grow our inline business in Benelux. We're confident this partnership will open up new growth opportunities for both sides, and we're looking forward to taking this journey together," added Ioannis Georgiadis, Business Development Manager at EyeC.

About EyeC GmbH

Founded in 2002, EyeC GmbH provides fast, accurate, and easy-to-use artwork and print inspection systems. EyeC is the only provider on the market that ensures product quality throughout the entire manufacturing process – from the first artwork file to the finished printed product. Products from EyeC provide users with 100% confidence about the print quality of their products, such as labels, folding boxes, package inserts, or flexible packaging. As a result, complaints and recalls are minimized, production costs are lowered, and quality testing is optimized. Around the world, more than 3,800 EyeC inspection systems are currently used by pharmaceutical companies, printers, and manufacturers of branded goods. The company currently employs a team of around 70 employees in Hamburg and has a global sales network spanning more than 100 countries. More information via [EyeC.com](https://www.eyec.com).
